

## Greeting from J.A. Wheeler

*Princeton University, USA*

Thank you for your kind invitation to the conference on the wonderful subject of Time.

It would be such a joy to take part in these discussions and to meet so many splendid colleagues.

Unfortunately, I myself have not discovered any way to manufacture time and therefore will not be able to attend. Let me call up the spirits of Landau and Mendeleev to bless this splendid enterprise. And, please, accept my good wishes for great success with the conference.

Truly yours,

**John Archibald Wheeler**
